Faculty of Physics, Astronomy and Applied Informatics Nicolaus Copernicus University, Grudziadzka 5, Torun, Poland

Purpose of meeting:

IONs, the International OSA Network of Students, connects you with people from around the globe, all actively engaged in optics and photonics. While ordinary scientific conferences focus strongly on just one particular topic in optics and are rather impersonal, IONs conferences focus on you. Present your latest results to fellow young scientists from across optics during the scientific sessions, discuss it, and get informed about other young scientist's cutting-edge research projects.

Organizers:

Nicolaus Copernicus University
OSA Chapter, Torun, Poland

Local Invited Professors:

Sebastian Mackowski
Ryszard Trawinski
Maciej Wojtkowski

Invited speakers:

Susana Marcos
David Sampson

Workshops:

Workshop I, Michalina Gora,
Translational research - from idea to the device
Workshop II, Daniela Hekiert,
The myth of talent and reality of being an Expert

Registration
15th May, 2013

Notification of acceptance
1st June, 2013

Payment for Social Day
10th June, 2013

Conference technical topics:

optical metrology,
quantum optics,
optical techniques,
photonic materials,
student chapters activities
optoelectronics materials and devices,
nanotechnology and material science,
